## Awards of EXCELLENCE 2005

### InterWrite SchoolPad (GTCO CalComp)

Like other management systems, InterWrite SchoolPad makes it easy for teachers to project a computer screen for class discussion. In this case, however, the computer in question is a diminutive Bluetooth-equipped tablet device. With the InterWrite SchoolPad, teachers or students can take notes on documents using an electronic pen, share their solutions with one another, project results from anywhere in the room, and much more. This package gets high marks for its easy and effective interface—and for the “cool factor” that makes for great classroom interactions.

*Windows/Mac-based hardware/software package; \$497. (Grades K–12)*

### Questia (Questia)

Questia Classroom combines an extensive prescreened library of academic resources (consisting of more than 50,000 full-text books and 400,000 with text mon for ti g intuiti Web-based; (Grades 9–
