## » What's New

### Software

GTCO CalComp's ([www.gtcocalcomp.com](http://www.gtcocalcomp.com)) **InterWrite PRS 3.2** software has been upgraded for the company's classroom response system. The new version allows Mac users to create and deliver questions in PowerPoint, and a new add-in module lets students register their transmitters when they log in to the Blackboard class site. Version 3.2 also features new reports for lesson questions, session reports, and class rosters.
